

REMARKS

Claims 11-22 are pending in this application. Above is a complete listing of all claims in the application, with their current status listed parenthetically. By this Response, claims 11, and 16-22 have been amended. Claims 23-28 are now cancelled. New claim 29 is presented.

Applicant's amendments were made based on a reconsideration of the initially filed specification and drawings, in view of the amendments previously presented, and not due to any reference cited as alleged prior art in this case. However, Applicant directs the Examiner to Applicant's March 26, 2007 Response, which fully addressed the Examiner's current rejections. Therefore, by these amendments, Applicant has made a bona fide attempt to advance prosecution of this case to allowance. Moreover, Applicant believes that the art cited by Applicant upon the initial filing of this application both resolves the background against which ordinary skill in the art should be measures, as well as representing the only relevant references necessary for examination of the claims presented herein. Accordingly, Applicant contends that no further search is necessary to complete examination of this case.

Applicant believes that the claims as amended are neither anticipated or obviated by the art of record in this application.

Conclusion

Applicant believes that this Response has addressed all items in the Office Action and now places the application in condition for allowance. Accordingly, a prompt, favorable reconsideration and allowance of claims 11-22 and 29 is solicited. Should any issues remain unresolved, the Examiner is invited to telephone the undersigned representative.

Respectfully submitted,

October 31, 2007
